Experience

PathFinder

August 2023 – September 2023

- Comprehensive 6-week course, providing in-depth knowledge on **User Experience (UX)** and **User Interface (UI)**. Displayed practical skills through the completion of three individual projects and a collaborative team project.
- Demonstrated proficiency in prototyping and wire framing tools, utilizing Figma to create interactive and visually compelling design concepts.
- Coordinated user research to identify trends and opportunities, ensuring design solutions adhere to industry standard.
Weekly projects: Designed Pathfinder app, Luxury restaurant interface design and Dessert delivery application

Round.finance

August 2023

- Collaborated with a team to design a interactive dashboard to help small business manage their finances.
- Conducted multiple Interviews with start-ups and SMBs, gathering feedback and insights to enhance the initial draft.
- Utilized user feedback and community resources to streamline our designs to maximise efficiency whilst maintaining the aesthetic.

Projects

Dashboard for Round.finance

August 2023

- Designed a transaction page, prototyped frames, defined typography and established a colour pallet strategically.
- Integrated client feedback to improve the functionality, accessibility and aesthetic of the designs. This resulted in a more intuitive and user friendly experience.
- Completed competitor analysis and effectively presented both design solutions and research findings to the clients.

Credit Card Fraud Detection | *Personal Project*

- Developed a machine learning model to detect fraudulent transactions, with a 99.97% accuracy, using a Random Forest classifier.
- Analysed large, imbalanced dataset of encrypted credit card transactions to identify fraudulent behaviour.
- Cleaned, Processed and Visualized the data, to ensure the accuracy of the model using both **SQL** and **Python**.

Dividends Based Investing | *Personal Project*

- Processed FTSE 100 companies constituents via Yahoo Finance API to determine highest dividends yield.
- Implemented key filters and visualized top 10 performers to compare the stocks, using **Python code**

Education

First Class Honours - BEng Chemical Engineering, Queen Mary University

2022 – 2025

- Awarded Chemical Engineering Student Certificate for Outstanding Academic Achievement.

2016– 2022

- A levels: Mathematics (A*), Chemistry (A) and Physics (B)

Mathematical Enrichment Programme | *King's College London Mathematics School*

2019

- Yearly program, designed for top achieving math students to enhance their problem-solving skills, critical thinking and mathematical ability.

Summer Boot camp | *King's College London Mathematics School*

2019

- Persistently tackled complex math questions by employing strategic approaches thereby honing my analytical and logical thinking skills.
